Interior Finish Standards:

SCHEME SUMMARY

Produced by Long Range Facilities Planning

Updated: July 2022
INTRODUCTION

In an effort to brand our interiors on the OSU Stillwater campus as well as aid in small renovations on campus, the following document outlines the specifications for four (4) interior finish standard palettes created by Oklahoma State University’s Long Range Facilities Planning. These palettes are intended for use on small renovations and may be used for guidance on capital projects overseen by FM CCS under $4 million. Larger capital projects (over $4m) will reference our Design Guidelines document also found on the Long Range Facilities Planning website.

All carpet included in this document can be purchased through OSU’s established carpet contract re: OSUA&M-RFP-001152-2022.

Prior to any final installation, we strongly encourage mock-up of carpet tile and luxury vinyl tile (LVT) to ensure proper installation direction and to address any manufacture defects prior to final installation.

Please note the following points when considering selections for your project.

  a) Many finishes do not cross over successfully to other palettes due to variation in tone, value, and pattern. We kindly request for exceptions to be presented to LRFP for consideration.
  b) We are not mandating that all buildings transition into these schemes. The schemes are intended to guide our project managers in small interior renovations and when transitioning older buildings into a more current branded aesthetic.
